

VOL.: 18 - ISSUE : 1

JUNE 2019 - OCTOBER 2019

If innovation and novel ideas are a key to a bright future, then we at Sri Prakash remain assured of our place under the pedagogic Sun. We offer multifarious disciplines in the areas of knowledge and enterprise in the form of encouragement from master minds for students. I extend my sincere thanks to **Dr. Chou Chien-Heng**, Asst. Prof., Dept. of Electro-Optical Engineering, Van-Nung University, Taiwan for a science workshop on Problem solving skills. My heartfelt thanks to **Dr. Khong Yoon Loong**, Founder, Penang Tech Centre, Malaysia for conducting innovative science workshop for Prakashites and **Dr. Sultan Ahmed Ismail**, Director Eco-Science Research Foundation, Chennai, for addressing parents to create a life that lives between them and their children. Further, I extend my heartfelt thanks to **Mr. Christopher Robbier Hoyer**, Robotics - Coach, U.S.A. for conducting workshop on robotics. A big thanks to **Dr. R.S. Praveen Kumar**, I.P.S., Secretary, TSWREIS, Telangana; **Ms. Malavati Poorna**, The youngest girl to scale Mount Everest; **Dr. A.N. Ramachandra**, Joint Commissioner (Academics), Navodaya Vidyalaya Samithi; I appreciate **Sri B. Ravindranath**, G.M. Prism Books Pvt. Ltd for launching and publishing the book 'Poorna'. **Swami Gunesh Milan Ananda**, R.K. Mission, Visakhapatnam for delivering the content of the book, **Mrs. Jasmeet Chandok**, Springdales School, New Delhi, for their august presence on the release of book 'Poorna'. I thank **Major Gen. (Retd.) Sanjay Soi** and **Dr. K. Srinivasa Rao**, M.D., IIBT for gracing Sri Prakash and addressing students on the occasion of 73rd Independence Day. My sincere thanks to His Holiness **Brother B.K. Mohan Singh**, Brahma Kumaris, Mount Abu; **Prof. Y. Satyanarayana**, V.C. and Founder, D.S. National Law University; **Dr. Meegada Ramalinga Swami**,

Global Teacher Prize winner - **Mr. Christian Williams**, Melbourne, Australia has inspired teachers and students alike with his inestimable life experiences. I thank him for his thoughtful address on Teachers' Day. Prakashites salute each and every guest starting from an inspirational and a self-driven photographer-Sri Mohit Jaipuri, India's

renowned Graphic designer and the best Photoshop and Lightroom Faculty and Sri Gautam Agrawal, a Professional photographer. They also show their gratitude towards **Sri B.K. Agrawal**, Fellow India International Photographic Council and **Sri C.V. Subrahmanyam**, Special news photographer, The Hindu, who have a long association with us and have consistently supported the novice photographers for about 11 years now. My sincere thanks to all, for encouraging and enhancing the knowledge of the budding photographers of Sri Prakash. I thank **Mr. Yuji Otake**, Japan for witnessing the musical talents using the recorder of the students. I would like to thank **Prof. V. Ramesh**, Dept. of Fine Arts, A.U., for gracing Sri Prakash and inaugurating an 8ft/8ft 'Painting Books Installation Art'. A portrait of Vikram Sarabhai created with hundreds of books on the centenary birthday of Vikram Sarabhai. I further extend my sincere thanks to **Dr. A.P. Jayaraman**, Senior Nuclear Scientist and Founder, Academy of STEAM for his interaction with students and teachers on Periodic tables. My sincere thanks to **Sri Satinder Kumar**, Eminent Educationist for addressing students and to **Dr. A.V.L.**

Jagannadharao, Retd. Deputy Commissioner, K.V.S. for his interaction with Prakashites. I extend my sincere thanks to the wonderful educators and teachers who came all the way to inspire our teachers to chisel our children into confident leaders: **Ms. Indira Subramaniam**, Teacher Educator and Trainer for enhancing the teaching skills of teachers; **Mrs. Nidhi Wadhwa**, Trainer and Product Manager, Indiannica learning for addressing teachers on engaging and involving students in teaching learning practices; **Ms. Monika Kackar**, Trainer and Story Teller, Oxford University Press, for enhancing story telling skills. I thank, The Guinness World Record holder, **Ms. Aditi Singhal**, Founder Dynamic Minds Group and International Memory Trainer for equipping with techniques of teaching mathematics among teachers and Ms Hema Malini, Passionate Biology Teacher, for addressing the teachers. My sincere thanks to **Dr. Shalini Kocherla**, Educational Counsellor, Chetana Counselling Centre for extending phonological awareness among English teachers. A huge thanks to **Mr. Champaknath Attavar**, Academic Consultant, for facilitating with best teaching and learning patterns in Mathematics. A big thanks to Carnatic Vocalist **Sri Prata Krishna Murthy** for his performance on World Music Day, **Sister B.K. Madhuri** for addressing students on values in life and **Mr. Sujit Paul**, Lt.Col S.K.Sundaram, N.C.C. Warrant Officers **Mr. M. Patra** and **Mr. A.V. Ramana** for gracing Sri Prakash on World Yoga

V.V. Sai Ganesh and **K. Naga Bhavani**, X for securing 1st and 2nd positions respectively, in the book reading contest Ahamahamika; **K.V.P. Kaushik** and **K.L. Karthikeya**, VIII for winning gold and Silver medals in individual Kumite and Kata championships organised by World Martial Arts Academy. **S. Gana Sri Harsha**, VIII for gold medal in individual Kumite in All India Wadokai Karate Championships, Ch Sai Charan, VIII, N.V.S.I. Rohit, Siddhu Vignesh and Eswar Ritwik of IX for being selected for VDCA under-14 cricket selections. A very special congratulations to the choir group of 108 students for making into International Wonder Book of Records by singing scintillating melody on World Photography Day.

Today as we march ahead, we pledge to work for every child and in the process open new vistas in the areas of education.

FUN, FROLIC AND INSIGHT THROUGH SCIENTIFIC EXPERIMENTS

Prakashites experienced an enhanced fun quotient through scientific experiments in the workshop conducted by Dr. Chou, a renowned professor from University of Taiwan. The concepts dealt were thermodynamics, fluid dynamics, aerodynamics and electricity. Dr. Chou exposed the world of day to day science to the students by involving them in practi-

cally forming into electrical circuit and demonstrated the discharge of charges through the students. Interesting video presentations were made to create curiosity and understanding in the participants on various principles of wind energy, geothermal energy that produces electricity to light up the lights.

HUBS of Learning

To promote academic enrichment through collaboration, CBSE has created a common platform called hubs of learning where in each school has the role and responsibility with the partner schools. In this regard Sri M.V.V. Prasad Rao, Director CBSE, RD Head, Centre For Excellence Kakinada, conducted an Orientation programme for the Principals creating an awareness through his workshop on the importance of developing collaboration for self improvement.

Sri Prakash Vidyaniketan had the privilege to honour Ms. Malavath Poorna, 'the youngest girl in the world to scale Mount Everest.' On this occasion, a book on Ms. Malavath 'POORNA', written by Ms. Aparna Thota was launched with an overwhelming pride and delight. Sharing her experiences Ms. Poorna expressed her gratitude towards her parents and her mentor. She was thankful to Dr R.S. Praveen Kumar IPS, Secretary, TSWREIS, who encouraged and was instrumental in her achievements, she gave a slogan **'IF I CAN, YOU CAN, ALL OF US CAN.'** She said that we should have a goal, should work hard and have discipline in life. Dr. Praveen Kumar gave his 'Ten Commandments' beginning with "I Shall..." which is a great encouragement

for today's youth. He said that students should explore their skills and strive to reach their set goals. Dr. A.N. Ramachandra - Joint Commissioner (Academics), Navodaya Vidyalaya Samithi delivered the 'Three principles of Education' about the permanent knowledge that remains within us. He also praised the Director, Ch. Vasu Prakash for giving opportunities to students to interact with 'world renowned' personalities. Swami Guneshmilan Ananda Rama Krishna Mission, advised the students to develop will power and confidence to reach their goals. Sri B. Ravindranath- G.M of Prism Books Pvt. Limited & Mrs. Jasmeet Chandok, HOD of Social Science - Springdales School Delhi, encouraged the students by

giving examples of the world achievers. It was a memorable moment when 'Ms. Poorna' was felicitated on the occasion. A melodious song was composed, sung and dedicated to Ms. Poorna by the Prakashites. Answering the queries, Ms. Poorna said "Tears of happiness rolled down as soon as I reached the summit. I was given the opportunity which I grabbed to prove that nothing is

impossible for a girl. I wish to triumph the 7 summits and also become an IPS officer.

Ms. Malavath Poorna
'If I can, You Can, all of us can.'

budding photographer to a great and sought after one. He also added saying that since India is a country with second largest business turnover in the field of world wedding photography, the demand for good photographers would always be on the rise. He advised the students to turn their passion into profession. When one gets paid for one's passion there wouldn't be anything more aspiring than that. Sri Mohit Jaipuri, captured the attention of the students by showing the details with which one can work on photoshop and create what one imagines in the most creative and innovative manner. He also said that without original photographs, photoshop gets nowhere.

As I take a walk down the memory lane, most of my happiest thoughts are those centered around my school life. Having been associated with our school during its formative years at Visakhapatnam, I belong to the first batch that completed schooling during 2003-4. During that period, several principles were instilled into my young mind, which shaped me into the person that I am today. One such dictum was "Hard work never goes in vain". Even after 15 years, the friendships that I have formed and my bond with the school and all the teachers remains strong as ever. I wish that our school will keep achieving greater accomplishments under the solemn guidance of our director, Vasu Prakash Sir, in the years to come.

My school gave me a number of opportunities to explore. I participated in various competitions and events and I can proudly say that my schooling here played a huge part in what I am today. We had the freedom to host programs and pursue our passions. The 1st International Science and Maths Festival was conducted here in Vizag when I was in my 8th grade. I had the chance to participate in CHEMUN (Chennai Model United Nation). We met students from different schools and colleges and had a lot of fun working together. Emphasis was put on living a healthy lifestyle. Meditation sessions were held every day which greatly helped relieve stress.

It gives me immense pleasure to express my gratitude to my school which provided me everything to do what I wanted to do. My schooling was a time full of memories, fun and learning which formed the foundation stone for my life. I learnt a whole lot of things from this very place right from dancing to debating and quizing which helped in the development of versatility within me. I got to meet many famous personalities and delegates from not only various corners of India but also other countries which helped in improving my interactive and communicative skills. The values and the knowledge which I have imbibed being a PRAKASHite were very helpful in the long run.

**PROUD

I will always remember the day that I joined Sri Prakash as a huge turning point in my life. All my teachers were always approachable and enthusiastic. Rather than monotonously drilling information into the students' minds, they were more practical and always listened to what we had to say. The confidence that I gained as an individual during that period contributed greatly to my learning curve, which remains high to this day. I would like to end this note with a special thanks to our Director, Vasu Prakash Sir, for his efforts at continuing to make us feel as a part of the Sri Prakash family even after 15 years.

The Learning Dais...

I feel delighted to share that I found it worthy enough sparing my time for the robotics workshop by Mr Robbie Hoyer, which educated me about the wonders of robotics. This workshop has provided me a platform to be able to explore the field of robotics and endorsed me to venture into the world of technology where I learnt to make circuits. My hands-on experience with batteries and LEDs shall stay imprinted in my mind for years to come. I thank my school for facilitating me this opportunity to be a part of this educational workshop.

- Ananya Patni , IX

An ingenious and inventive workshop was conducted by our school on the making of Solar Urja Lamp which is a step forward in exploring the usage of solar power in our day to day lives. The hands on activity of assembling 'Solar Study Lamp' was indeed wonderful. Each step kindled curiosity in each of us and the completion of it paved way to pride and joy in us. I found it very encouraging and fulfilling to be a 'Student Solar Ambassador'. This title has created an earnest desire in me to propagate the use of solar energy to each and everybody I come across.

- M.Manmitha, VIII

My horizon of learning was extended when I witnessed a seminar in my campus, the resource person being a 13 year old - Md. Hassaan Ali who teaches engineering students. I learned from him that age has no bar for learning and if one has the spirit to learn, nothing can stop you.

-CH. Pragya , x

TECH 2018 was a wonderful experience for me which came true through our school. This seminar changed the way of my learning and showed a new path of enriching my education with the help of technology. It was an enthusiastic experience which was shared by many international delegates and by our Former Chief Minister Sri Nara Chandrababu Naidu.

There were many other eminent personalities who helped me to pursue education beyond my course through the means of technology.

- Swyam Kumar, x

My hard work paid me success. I whole heartedly thank my school, my teachers and Rotary Club for providing me a platform to showcase my talents. 'ROTO - GENIUS', this success will give me strength to face challenges in life.

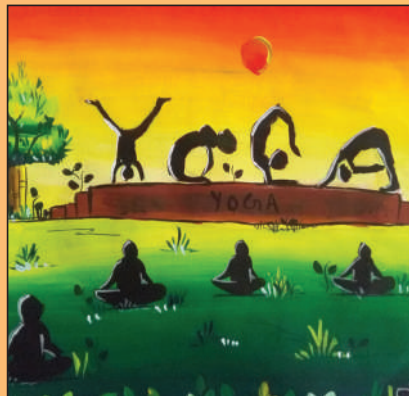

- Keelu Chaitra , x

The book 'Poorna' is inspirational. Hardship doesn't stop anyone from achieving big. Ms Poorna is a role model for many in India. Her presence made us all proud. Her journey will give me courage and confidence to reach my goal.

A great way of developing 'Individuality' is by living as a Hosteller at Sri Prakash Vidyaniketan. Prakashite Hostellers avail all the possible exposure to life at their hostels in a variety of ways. Along with education, they acquire the experience of Yoga, Games, Traditional activities etc.

A homely atmosphere is set throughout the year with the celebrations of 'Birthdays' and Festivals. This year too, they had taken in the divinity through "Ganesh Chaturdhi" when they prayed for their future and enjoyed dancing in the evening in the name of 'Lord Ganesh'.

The Architect of India's White Revolution

Dr. Verghese Kurien "billion-litre idea"

gave birth to the world's largest agricultural dairy development programme, that made dairy farming India's largest self-sustaining industry.

Fondly known as the Milkman of India, Dr. Kurien is the man behind the flourishing state of Indian milk and the dairy industry.

Early life and education : He was born on 26 November 1921 in Kozhikode, Kerala to a Syrian Anglican family and schooled at Diamond Jubilee Higher Secondary School, Gobichettipalayam, in Coimbatore district (now in Erode district, Tamil Nadu) while his father worked as a civil surgeon at the government hospital there. He joined Loyola College in Madras (now, Chennai) at the age of 14, graduating in science with physics in 1940, and then got a bachelor's degree in mechanical engineering from the College of Engineering, Guindy which at that time was part of University of Madras, in 1943. He had to fend for himself as he was young for his age in every class. This according to him, developed his sense of independence. He lost his father at 22 and his grand-uncle moved his family to his home in Trichur (now Thrissur). A keen military cadet and a boxer at college, when he

wanted to join the army as an engineer, his mother persuaded him to join the Tata Steel Technical Institute, Jamshedpur on a recommendation to the management by his uncle, who was a director with the Tatas, and from where he graduated in 1946, but soon found himself wanting to get away from the hangers-on and yesmen of his uncle. So he left and applied for a government of India scholarship, and was chosen to study dairy engineering, an irrelevant discipline, much to his surprise and reluctance, but this time his uncle (by now, the finance minister) refused to bail him out. He was thus, sent to the Imperial Institute of Animal Husbandry in Bangalore (now, National Dairy Research Institute, southern station, Bengaluru) where he spent nine months, and merely bid time out to be sent to America. Here too, by choosing some dairying electives, rather perfunctorily, at Michigan State University, he returned with a master's degree in mechanical engineering (metallurgy) (with a minor in nuclear physics), instead, in 1948. While there, when he found himself at the receiving end of racist jibes, in his words, "the Indian in him, saw him put the natives back in their place". Later, he would say, "I was sent to ... study dairy engineering (on the only government scholarship left) ... I cheated a bit though, and studied metallurgical and nuclear engineering, disciplines ... likely to be of far greater use to my soon-to-be independent country and, quite frankly, to me." He did train in dairy technology, with a sense of purpose eventually, in 1952-53, on a government sponsorship to New Zealand, a bastion of cooperative dairying then, and to Australia, when he had to learn to set up the Amul dairy.

Verghese Kurien life times of a white knight

He lost his father at 22 and his grand-uncle moved his family to his home in Trichur (now Thrissur). A keen military cadet and a boxer at college, when he wanted to join the army as an engineer, his mother persuaded him to join the Tata Steel Technical Institute, Jamshedpur on a recommendation to the management by his uncle, who was a director with the Tatas, and from where he graduated in 1946, but soon found himself wanting to get away from the hangers-on and yesmen of his uncle. So he left and applied for a government of India scholarship, and was chosen to study dairy engineering, an irrelevant discipline, much to his surprise and reluctance, but this time his uncle (by now, the finance minister) refused to bail him out. He was thus, sent to the Imperial Institute of Animal Husbandry in Bangalore (now, National Dairy Research Institute, southern station, Bengaluru) where he spent nine months, and merely bid time out to be sent to America. Here too, by choosing some dairying electives, rather perfunctorily, at Michigan State University, he returned with a master's degree in mechanical engineering (metallurgy) (with a minor in nuclear physics), instead, in 1948. While there, when he found himself at the receiving end of racist jibes, in his words, "the Indian in him, saw him put the natives back in their place". Later, he would say, "I was sent to ... study dairy engineering (on the only government scholarship left) ... I cheated a bit though, and studied metallurgical and nuclear engineering, disciplines ... likely to be of far greater use to my soon-to-be independent country and, quite frankly, to me." He did train in dairy technology, with a sense of purpose eventually, in 1952-53, on a government sponsorship to New Zealand, a bastion of cooperative dairying then, and to Australia, when he had to learn to set up the Amul dairy.

Turning point

: In 1949, Kurien was sent by the government of India to its run-down, experimental creamery at Anand, in Bombay province (later Bombay state and now part of Gujarat state since 1960), and began to work rather half-heartedly, to serve out his bond-period against the scholarship given by them for his master's degree. He began to while away his time going off to Bombay city on weekends and on some pretext of work or else, volunteering to tinker with the primitive dairy equipment of Tribhuvandas Patel, who sought his help to process the milk of farmers he had brought together after a strike in 1946, forming a cooperative

Dr. Kurien with his parents, brothers & sister.

Anand after a mere visit, invented the process of making skim milk powder and condensed milk from buffalo milk, instead of from cow milk, said impossible by

Foundation of the dairy and its pattern

: The farmers faced a problem of fluctuating milk production as surplus milk would find no takers in the flush season, and turned to the cooperative for help, where an idea took root to try convert this surplus to milk powder. Kurien's batchmate from America and dairy engineer H. M. Dalaya, who he persuaded to stay back at

directly to consumers in the market by eliminating middlemen, ensuring them a steady and a regular income even during the lean season, and a better quality produce at a competitive price, to the consumer in the large market of the reachable Bombay city, on a steady supply over well-paved village "milk roads" and a 'cold-chain'. It then took on established competitors, viz. government-run Aarey dairy's Bombay Milk Scheme and private-run Polson dairy, in the Bombay market, and gained a share with these products along with its famed butter.

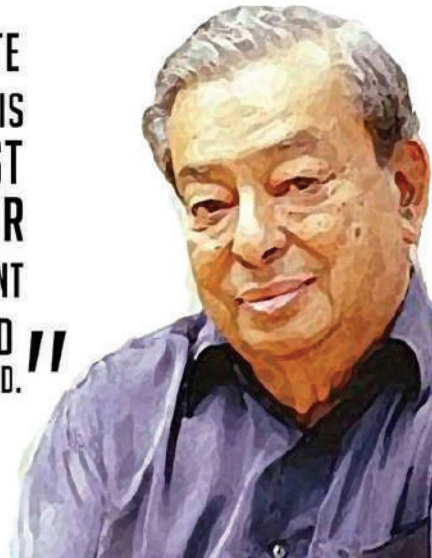

Awards and honours In 2014, all the dairy majors of the country, along with the Indian Dairy Association, resolved to observe Kurien's birthday, November 26, as National Milk Day

- 1999 Padma Vibhushan
- 1997 Order of Agricultural Merit
- 1993 International Person of the Year
- 1989 World Food Prize
- 1986 Wateler Peace Prize
- 1986 Krishi Ratna
- 1966 Padma Bhushan
- 1965 Padma Shri
- 1963 Ramon Magsaysay Award

"LIFE IS A PRIVILEGE AND TO WASTE IT WOULD BE WRONG. IN LIVING THIS PRIVILEGED "LIFE" YOU MUST ACCEPT RESPONSIBILITY FOR YOURSELF, ALWAYS USE YOUR TALENT TO THE BEST OF YOUR ABILITY AND CONTRIBUTE SOMEHOW TO THE COMMON GOOD."

- Dr. Verghese Kurien

Indira Gandhi

society to purchase their milk, at Kaira (now, Kheda) nearby. He had already made up his mind to quit the government job mid-way and leave Anand but, was persuaded by Tribhuvandas to stay back with him after quitting them, and help him set up his dairy. Tribhuvandas efforts and the trust placed in him by farmers inspired Kurien to dedicate himself in establishing that dairy cooperative, Kaira District Cooperative Milk Producers' Union Limited (KDCMPUL) (which came to be known popularly as Amul dairy), at Anand.

dairy experts around the world. In India, buffalo milk was plentiful while, cow milk was in short supply, unlike Europe where it was abundant. This was the reason Amul would compete successfully and well against Nestle, the leading competitor, which used cow milk to make them, and later against Glaxo for baby food. Later research by Dr. G. H. Wilster led to cheese production from buffalo milk at Amul.[32] To cut costs, Kurien got a captive packaging-tin unit attached to the dairy in a collaboration. Amul thus got dairy farmers organised in the villages and linked them

You changed the lives of 15 million farmer families.
You revolutionised the dairy sector.
You gave India 200 Amul brands.
